

## >>About the Link section of Buggin Mods

This is an ongoing list of websites that I have come across that are in some way relative to New Beetle products. There are also several links for other companies and organizations that I have found to be very useful. You can also find several different links to manufacturers of car audio equipment as well as interior products and general universal modifications. It is in every attempt that I am trying to keep this list as comprehensive and clean as possible, however I cannot be held responsible for any adverse affects of visiting these websites.

## >>Reporting an Invalid or Bad Link

Should you come across a link that is no longer active, or is bad in general please feel free to report this. I have attempted to make this process as simple as possible. Merely click on the link titled "Report Link" following the link you wish to report. Once doing so you will be redirected to a confirmation page notifying you that the request has been sent. Once confirmed merely press the "Back" button or the combination of "Alt + Back Arrow" to return to the link page.

## >>Posting Your Own Link

Do you have a website you feel should be included in this list? Do you have a personal website that you would like to have listed? Simply click on this following link to be taken to a quick form to submit your request. Once I have determined the eligibility of the link it will be posted. Should the link be of offensive content matter or in no way applicable to New Beetles or any form of automotive tuning and performance, it WILL NOT be posted in this list. Once you feel you understand the terms of this feature you may continue on to the submission page: [[Submit Personal Link](#)]
